safous | THINK YOUR ACCESS

Legal Sector Case Study

Safous Secures Cloud ERP Access for a Law Firm's Vietnam Office

AT A GLANCE

Industry	**Legal services**
Location	**Vietnam office**
Users	**Finance staff & ERP admins**
Target system	**ERP on a cloud in Vietnam**
Also fits	**Healthcare · Finance · IT/MSP · BPO**

A leading law firm moved its ERP to a new cloud in Vietnam. Its finance team and ERP administrators needed secure access from day one.

The Challenge

Hard cutover deadline. The old remote access ended at migration. New access had to work on day one.

No exposure, no VPN. The ERP could not be exposed online, and VPN clients were too much for finance staff.

Two kinds of access, one standard. Finance staff use the ERP daily; admins need privileged access for maintenance.

Fast access from Vietnam. Daily ERP work needed responsive connections for local users.

The Solution

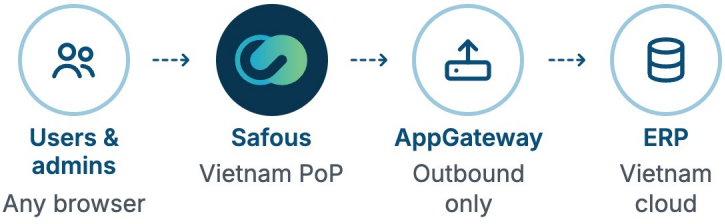

Live in time. The AppGateway is up in under 10 minutes. No network redesign, no hardware.

Zero exposure, zero agents. The outbound-only AppGateway keeps the ERP invisible. Staff just use a browser.

Identity-first, credential-free. MFA via the firm's IdP and SSO for both groups. Admin sessions are controlled and logged.

A PoP in Vietnam. Sessions stay local and fast, close to both users and the ERP.

How It Works

1. Sign in from a browser with MFA via the firm's IdP
2. Safous checks policy and connects via its Vietnam PoP
3. SSO into the ERP. Every session is logged

The Outcome

- No VPN to build, patch or support
- No ERP exposure, nothing to scan
- One browser sign-in for finance staff
- Admin maintenance controlled and audit-ready

WHY THEY CHOSE SAFOUS

Fast to deploy · Agentless · PoP in Vietnam · Backed by IIJ

About Safous — Provided by IIJ (Internet Initiative Japan), Japan's first ISP, listed on the Tokyo Stock Exchange Prime Market. ISO/IEC 27001 certified and SOC 2 attested. PoPs across Asia, plus North America and Europe. Customer name withheld for confidentiality.
